Webinar Handout: Get the Most of Your Smart Matches™ & Record Matches

Thank you for joining today's webinar! Use this guide as a quick reference to remember the key tools and tips we discussed for making incredible discoveries on MyHeritage.

Part 1: Discover New Matches on Your Homepage

Your family site homepage is now the best place to start. Look for the new discovery "widgets" that bring fresh clues directly to you.

- **Record Matches:** Finds your ancestors in billions of historical records like census data, obituaries, newspapers and immigration documents.
 - **Photo Discoveries™:** Uncovers photos of your relatives from other members' family trees.
 - **Matches of Close Relatives:** This widget highlights new Smart Matches™ and Record Matches for your closest family members, which can lead to major breakthroughs.
-

Part 2: Review Matches with the New All-in-One Page

We've redesigned the Review Match page to make it simpler and more powerful (will be gradually released in the next few weeks).

- **Unified Experience:** All the information you need is now on one easy-to-read page.
 - **Clear, Side-by-Side Comparison:** Easily see what information you have in your tree versus the information in the match.
 - **Highlights What's New:** The page automatically points out **NEW, MORE COMPLETE,** or **DIFFERENT** information, so you can focus on what matters.
-

Part 3: Pro Tips to Trigger New Matches

You can prompt the MyHeritage system to search for new matches by giving it new information to work with. Remember:

New Clues = New Searches.

- **Tip #1: Add a New Person to Your Tree**
 - Every new individual (an aunt, a cousin, a sibling) is a new opportunity for MyHeritage to find a match.
 - **Tip #2: Update an Existing Person's Profile**
 - Adding or correcting information like a **date** (birth, death), a **location** (city, country), or a **maiden name** gives our system new clues for its search.
-

Your Genealogy To-Do List

- Log in** to MyHeritage and explore the new widgets on your homepage.
- Review one pending match** using the new, simplified Review Match page (if available).
- Add at least one new relative** to your family tree — even if you only know their name.
- Find one ancestor** with missing information and add a new detail(s) (like a birth date or death date).

Happy Researching!
