How to Import a Family Tree Maker file into Legacy Family Tree

It's pretty simple. 2 Steps.

1) In Family Tree Maker, go to File > Export and change the Output format to GEDCOM 5.5.

Individuals to export	Output format:
Entire file Selected i	viduals GEDCOM 5.5 ~
Individuals included:	T Privatize living people
	✓ Include private facts
	Include private notes
	Include media files
	Include private media
	Include tasks
	Include charts, reports, and books
	Include only items linked to selected individuals

Click OK and OK again. Click Save.

2) In Legacy Family Tree (download free at <u>www.LegacyFamilyTree.com</u>):

- Go to File > Import > GEDCOM file
- Click the Select button, select the GEDCOM file you created in step 1, and click Open and click Open.
- Click the Start the Import button.

Enjoy Legacy Family Tree!
