Q: I have been creating famikly history scrapbook pages as gifts for cousins on my mother's side for 13 years. Each year they get 3-6 sets of pages and I have enough ideas for amny more. Because I create multiples, they are more simple than these examples, but are very similar in content. I have one in each family and now other cousins are interested so am looking at scanning to Cd now. Tying to figure out how to deal with the interactive components for that project.

Before long, my middle brother came up to me and asked: "Why did you do it in black and white? Why not color?
